

NITROUS PRESSURE GAUGE

Part #82005

- Superior quality gauge is designed for accuracy and long life
- Allows precise monitoring of bottle pressure
- Anodized for a high-quality, competition look

NITROUS BOTTLE HEATER

Part #82006

- Automatically maintains optimum bottle pressure with precision thermostats
- Velcro straps for fast and easy installation on the bottle
- Electrical components are pre-assembled and molded into the heater for ease of installation

PLUG-IN NITROUS BOTTLE HEATER

Part #82045

- Automatically maintains optimum bottle pressure with precision thermostats
- Velcro straps for fast and easy installation on the bottle
- Electrical components are pre-assembled and molded into the heater for ease of installation
- No wires to hook-up, just plug-in to your cigarette lighter or power point

PROGRAMMABLE TPS SWITCH

Part #82108

ZEX™ has taken its patented TPS activation circuit and placed it in an easy to install, stand alone unit. This switch allows anyone with a non-ZEX™ nitrous system to enjoy the benefits of using their throttle position sensor to reliably activate their nitrous system at wide-open throttle.
