ZEX™ 2010 V6 Camaro Nitrous System

ZEX™ introduces the first nitrous system on the market specifically designed for the new 2010 Chevy V6 Camaro, capable of up to 100 additional horsepower

With the release of the new 2010 Chevy Camaro, ZEX™ engineers have custom designed a nitrous system specifically tailored for the new technology, direct injection V6. ZEX™ engineers not only tuned the kit to add 55-100 additional horsepower but also made the installation easy and ensured engine safety at the same time.

This innovative nitrous system's Active Fuel Control™ adjusts fuel delivery with changes in nitrous bottle pressure, so that your engine never runs too rich or too lean while spraying. In addition, the system also offers an electronic TPS switch for reliable system activation at wide-open throttle; perfect for the Camaro's throttle-by-wire system. These patented, innovative features are what makes a ZEX™ nitrous system unlike any other nitrous system out there.

The easy-to-install ZEX™ nitrous kit is available in both the classic purple powder-coated bottle and our new Blackout series with its black powder-coated bottle. The ZEX™ kit is simply the easiest way to add serious performance to the new Camaro while at the same time ensuring engine safety. With all of the extra torque and horsepower, you will be passing SS Camaros in no time! For more information about the ZEX™ 2010 V6 Camaro Nitrous System or any other ZEX™ product, call us at 1-888-817-1008, or visit us online at www.zex.com.

Quick Summary

Product: ZEX™ 2010 V6 Camaro Nitrous System
Part Number: #82367 (Classic Purple Nitrous System); #82367B (Blackout Nitrous System™)

Features & Benefits:

- Adjustable from 55-100 additional horsepower
- Active Fuel Control™ adjusts fuel delivery with changes in nitrous bottle pressure
- Throttle-by-wire TPS switch activates nitrous at wide-open throttle
- Nitrous system operates at an engine safe air/fuel ratio
- Easy installation and a tune that maximizes engine safety and power; a must with the V6 Camaro's direct injection engine
