ZEX™ Liquid Filled Nitrous Pressure Gauge Kits

When the little details mean winning or losing races, a higher quality nitrous pressure gauge is a must have

Serious racers know that optimum nitrous system performance is generated when bottle pressure is maintained between 900-1000psi. To monitor this accurately, ZEX™ has just released a liquid filled gauge option for our popular nitrous pressure gauge kits. The gauge offered in these kits is of superior quality, and the liquid filling helps protect the gauge's precise internal components from severe vibration commonly found in race cars and serious street/strip type vehicles.

The ZEX™ liquid filled gauge kits are specifically designed to fit any manufacturer's nitrous system. Two models are available, one for -4AN delivery lines and the other for the larger -6AN sized lines. The kits include the 0-1500psi range gauge and either a -4AN or -6AN in-line adapter.

For more information about the ZEX™ Liquid Filled Nitrous Pressure Gauge Kits or any other ZEX™ product, call us at 1-888-817-1008, or visit us online at www.zex.com.

Quick Summary

Product: ZEX™ Liquid Filled Nitrous Pressure Gauge Kits

Part Number: #82341 (-4AN); #82342 (-6AN)

Features & Benefits:

- Liquid filled gauge for accuracy and durability
- 0-1500psi range
- Compatible with all manufacturer's nitrous systems
- Includes either -4AN or -6AN in-line adapter

#82342

#82341
