ZEX™ Safe Shot Nitrous Upgrade Kit

New kit from nitrous innovator ZEX™ offers everything needed to upgrade the Safe Shot Nitrous System to a full power wet kit – giving you an additional 55-175 horsepower

Nitrous experts at ZEX™ have recently developed the Safe Shot Nitrous System, an innovative “cheater” nitrous system that safely adds anywhere from 15 to 35 horsepower. However, when it comes to serious performance enhancement, bigger horsepower gains are often needed. That’s why the engineers at ZEX™ developed the Safe Shot Upgrade Kit, which allows the Safe Shot Nitrous System to be upgraded to a complete high performance wet kit and safely spray an extra 55 to 175 horsepower.

The upgrade kit features everything needed for the conversion, including a high-flow fuel solenoid, wet nitrous nozzle, tuning jets, stainless steel braided lines and a host of additional components. The ZEX™ patented electronic TPS switch is also included for safe nitrous activation only at wide-open throttle. Installation of the kit can easily be completed in just one hour.

This is truly the perfect addition to the Safe Shot Nitrous System for those who have outgrown the modest power increases that are provided by the base kit. For more information about the ZEX™ Safe Shot Upgrade Kit or any other ZEX™ product, call us at 1-888-817-1008, or visit us online at www.zex.com.

Quick Summary

Product: ZEX™ Safe Shot Upgrade Kit

Part Number: # 82358

Features & Benefits:

- Turns ZEX™ Safe Shot Nitrous System into high-powered wet nitrous kit for up to 175 additional hp
- Upgrade kit includes fuel solenoid, wet nitrous nozzle, tuning jets, stainless steel braided lines and all needed electrical components
- Electronic TPS switch included for safe nitrous activation at wide-open throttle
- Fully compatible with newer throttle-by-wire vehicles & installs in less than one hour
